

## **Senior Project Engineer**

Our client, located in Baraboo, WI is seeking to add a Senior Project Engineer to its team. A Senior Project Engineer will be responsible for leading projects in the areas of equipment procurement, new business opportunities, continuous improvement, and safety.

### **Responsibilities:**

- Manage large projects in the areas of new business opportunities, equipment upgrades or procurements, continuous improvements, and safety.
- Responsible for all aspects of projects to include equipment, process, fixturing/tooling, appropriate documentation, and training.
- Responsible for collaboration with new process/product development team.
- Responsible for identifying continuous improvement activities and driving to completion, including supporting all engineering support requests.
- Diagnose the root cause of equipment and process problems and then implement steps toward alleviating those problems or variations.
- Lead and manage several projects at one time and take initiative in the design/procurement of new equipment.

### **Qualifications:**

- B.S. Degree in Mechanical Engineering or related Engineering field or equivalent relevant experience with a good understanding of the plastics industry. Strong technical skills with the ability to communicate effectively and accurately.
- Familiarity with CAD systems and MS Office including project management software.
- Minimum of 5 years in a project management/engineering position related to manufacturing.
- Experience with extrusion tooling.
- Must think independently and possess strong communication skills both writing and verbal, in order to convey ideas and concepts to upper management and to production employees.

### **Application Process:**

Qualified individuals interested in being considered for the position are invited to send a resume with salary expectations to:
